# A UNIVERSITY ATMOSPHERE NOURISHED BY ENTREPRENEURIALISM

Faculty of Economics, Administrative and Social Sciences in Istinye University, contributed by the entrepreneurial culture of Istinye University, ISU Technology Transfer Office and Incubation Centre, which focuses on digital transformation and data science; trains managers who can read global change well, analyse data, produce information with a critical perspective and make a difference with innovative approaches in the international arena. Our students, who can accurately diagnose organizations on their digital transformation journey with the support of educational content in all our departments, graduate as analysts with the skills to create value from data.

## Leaders to Shape the Competitive World are Raising

The faculty, which has designed the education program in a way to cooperate with the sector in every field; aims to train leaders who can think analytically, are critical, researcher, open to creative thinking, and can produce solutions for social and problems. Our faculty offers the opportunity to take courses from a competent staff that has come to the fore in the academic field and in the sectors where students will work in. It has a training content supported by advanced technology that focuses on people, gives the ability to evaluate new ideas with tolerance, is participatory, focuses on the values of justice and aims to create value.

## Interdisciplinary Approach in Global Standards

In the faculty, with its quality in education and training and strong academic staff, adopts to be recognized and preferred by not only nationally but also internationally in both academic and scientific fields. It aims to raise graduates equipped with knowledge and skills at global standards, advanced in social aspects, and able to develop and implement contemporary strategies suitable for their fields of work. Our students, each of whom has gained professional skills in their own departments, can also develop themselves in approaches in different fields of study and sectors.

# DEPARTMENTS

## Economics

(English)

In the Department of Economics, which offers our students an education program that takes into account the basic economics issues as well as current trends, a rich program has been created by supplementing the interdisciplinary fields of study with elective courses. In order for our students to discover their areas of interest, places where different perspectives are put forward and ideas are exchanged are created. In our department, inter-sectoral cooperation is given importance in order to raise self-confident economists who follow innovations and respect ethical values in the private sector, public sector and academia. It is one of our primary goals to train leading economists who analyse current economic problems, produce innovative solutions for them, and create value for society by following global developments. In line with these priorities, our Department of Economics aims to make its graduates the first choice of organizations seeking research economists.

## Business

(English)

Department of Business in Istinye University trains ethical managers and entrepreneurs who have the scientific and professional knowledge required by the 21st century management approach, who can immediately adapt to new technologies, can work with big data, can write their own code by themselves when necessary, have high communication skills, can manage crises, and can work in almost every sector and field. In our age where the most important facts that will make a difference are to adopt sectoral innovations and use them correctly, the successful manager of the future is flexible and creative, so s/he must actually be an artist of some kind. In line with this; quality data collection, editing, accurate analysis and interpretation capabilities can be listed as the most sought-after managerial features in different functions of businesses from production to marketing, from purchasing to finance.

## International Trade and Business

(English)

Department of International Trade and Business aims to raise graduates who know the dynamics of today's global business world; can work in harmony with different cultures; can analyse cultural, legal, economic and political forces; realize real-world experiences thanks to the participation of business professionals in teaching and; have a deep understanding of the world market. In addition to the basic business courses, our department has a rich education program consisting of various department-specific specialization courses such as global financial markets, investment management, logistics, e-commerce, international marketing, intercultural management, international trade practices, compulsory second foreign language courses and non-field elective courses. It applies the 7+1 model and encourages our students to start their active business life by choosing the "Workplace Application" in the last semester of their education or to progress academically by doing "Project" work.

## Health Management

(Turkish)

Department of Health Management which aims to contribute to the main purpose of protecting, improving and improving the health level of individuals and society, trains health managers with strategic orientation and ethical values; who will lead the design, operation, performance evaluation and solution of problems at health institutions. The graduates who have the competencies to work in pharmaceutical companies, patient care companies, supply chain companies, companies that provide consultancy on health insurance and institutions affiliated to the Ministry of Health; can be employed as managers, human resources personnel, CEO, planner in all health institutions and, if they wish, as an administrator in areas other than health management.

## Management Information Systems

(Turkish/English)

The departments which have educational content in two different languages in English and Turkish; as its basic definition, aims to educate individuals who have a good command of the basic functions of businesses and computer science, and who can solve the problems of organizations by using information tools. Our department which is aware of the fact that it is not realistic to understand a business without data, to give direction to it, to solve a problem without data; aims to train graduates who responds to the needs of institutions and organizations by combining their knowledge of business functions with their skills in information technologies and data analysis; have the necessary knowledge and skills to enable these structures to survive in the face of new technologies and to maintain their existence in the digital world, and to organize their transformation.

## Political Science and Public Administration

(Turkish)

Department of Political Science and Public Administration Department which has a rich educational content; aims to train leading, well-equipped and respected political scientists and public administrators in their fields. Our department which offers our students a highly qualified undergraduate program in an innovative and creative thinking environment; has an inclusive content that embraces all fields of political science such as comparative politics, public administration, political philosophy, political economy and international relations. The main mission of our department is to implement an educational approach that is interactive, student-centred and gives importance to professional practice.

## International Relations

(English)

Department of International Relations which is shaped with an interdisciplinary approach, aims to train experts with scientific formation who can understand international developments analytically. The department, which aims to equip students with the basic knowledge and scientific perspective of the field, encourages them to turn to different fields with the variety of courses in the curriculum during the period of education. Our graduates, who support the establishment of their careers on solid foundations with international exchange programs, minor and double major opportunities; can work as experts in public institutions, especially the Ministry of Foreign Affairs. They can also be employed in the private sector, financial institutions, international institutions and organizations.
